

ALKAL

ALKALINE ADDITIVE FOR INDUSTRIAL LAUNDRIES

GENERAL DESCRIPTION

Blend of alkaline components, sequestering agents and booster to be used with the detergent emulsifier LAVAMIX SUPER to wash clothes, linens in cotton, polyester and other fabrics resistant to alkaline washing. Do not use for wool or silk fabrics.

DIRECTIONS FOR USE

Use with automatic dosing systems together with LAVAMIX SUPER.

The dosage depends on the hardness of tap water.

Water hardness

Soft water (0°F – 15°F)

Medium water (15°F – 25°F)

Hard water (oltre 25°F)

Prewashing

4 g/kg of dry laundry

6 g/kg of dry laundry

8 g/kg of dry laundry

Washing

5 g/kg of dry laundry

8 g/kg of dry laundry

10 g/kg of dry laundry

The pre-washing temperature is normally 30-40°C; the washing temperature is higher, up to 80-90°C and depends on the type of fabric. Check the specific data sheets.

TECHNICAL DATA

Appearance	transparent colorless liquid
pH	13.0 ± 0.3
Density	1.303 g/ml
Active contents	29%

Chemical composition– Reg. (EC) n° 648/2004

- Phosphonates

conc. < 5%

WARNINGS

Labelling

Danger

Causes severe skin burns and eye damage.

Product subject to ADR Norms: **UN 1719 Class 8 PG III.**

Read carefully the safety data sheet before use.
