# **INDUSTRIA F**

# STRONG DESCALING DETERGENT BASED ON HYDROFLUORIC ACID

## **GENERAL DESCRIPTION**

INDUSTRIA F contains surfactants, Hydrofluoric acid and other inorganic acids.

It is mainly used for the deep washing of Terracotta and concrete floors.

It removes residues of iron oxides, scaling manganese oxides and silicates.

It opens the pores of compact terracotta floors and quartzed concrete to allow good adhesion of sealers and floor polishes.

#### **DIRECTIONS FOR USE**

For the deep cleaning of Terracotta floors and concrete quartzed floors use at 10-20% (100-200 grams with 900 – 800 grams of water). For that use it is suggested to make a blend with the product DEKACID (1 litre of **INDUSTRIA F** + 1 litre of DEKACID + 8 litres of water). Damp the floors or wash it with plain water. Then apply the solution, let act and rinse with water. Use a rotary machine with a black pad.

Do not use on marble or terrazzo surfaces.

#### **TECHNICAL DATA**

Appearance	Green liquid
рН	Inferior to 0.5
рН 3%	$3.0 \pm 0.2$
Density	1.097 g/ml
Active content	17%

### Chemical composition - Reg. (CE) n. 648/2004

- Non-ionic surfactants conc. 5%
- Anionic surfactants conc. 5%

The product contains surfactants with a minimum primary biodegradability of 90% and aerobic biodegradation in compliance with Reg. (EC) 648/2004.

#### **WARNINGS**

The product damages ceramic tiles, gres and glass.

Always carry out a test before using the product to check aggression and contact times.

#### Labelling

#### Danger

Toxic if swallowed or in contact with skin. Harmful if inhaled. Causes severe skin burns and eye damage. Corrosive to the respiratory tract.

The product is subject to ADR regulations: UN 1790 Class 8 GI II.

Read carefully the safety data sheet before use.

Kemika is not liable for any damage caused by incorrect use of the product.
